

BEAUTIFUL, SAFE UNDERFOOT, AND EASY TO CARE FOR

# Caring for your Microtech Tiles

A clever finish that stays matt and elegant when dry, and turns confidently non-slip the moment it gets wet.

THE CARE SYSTEM WE CHOOSE

● **Fila Solutions**

YOUR NEW ZEALAND PARTNER

● **Surtec**

Microtech Finish Tiles · A care guide from European Ceramics · Fila Solutions supplied in New Zealand by Surtec

Microtech is a smart choice for a busy home: a natural matt look that becomes reassuringly grippy the instant it is wet, so the same tile stays safe in your bathroom, kitchen and living spaces. Caring for it is straightforward.

**European Ceramics** chooses the **Fila Solutions** care system to protect and maintain your tiles and stone. In New Zealand, Fila Solutions is supplied and supported by **Surtec**, the exclusive Fila agent, so expert help is always close by.

## **Matt and elegant**

A soft, natural finish when dry.

## **Grip when wet**

Extra slip resistance the moment water lands.

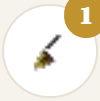

## **Safe throughout**

One tile, confident footing all through the home.

## Your everyday routine

### 1 Sweep or vacuum

Clear loose dirt and grit from the textured surface.

### 2 Damp mop

Warm water and a capful of Fila Cleaner Pro. No rinsing.

### 3 Wipe spills

A quick wipe keeps the fine texture looking its best.

## Your everyday cleaner

### FILA SOLUTIONS

## Fila Cleaner Pro

EVERYDAY CLEANER

Gentle, pH-neutral and streak-free, this is all you need for regular cleaning. It lifts everyday dirt from the texture without leaving residue, and is safe on grout and every surface around it.

**HOW TO USE** Add a capful (about 25 ml) to a 5 litre bucket of warm water and damp mop. Avoid waxes and shine polishes, they fill the texture.

[Shop Cleaner Pro →](#)

## A deeper refresh, a few times a year

### Give the texture a proper clean every few months

Because Microtech has a fine anti-slip texture, an occasional deeper clean lifts anything the daily mop misses. Dilute **Fila PS87 Pro** in warm water, work it over the floor, then lift all the dirty water with a wet vacuum or towels and rinse. That last step matters, it stops dirt settling straight back in.

### Just had your tiles laid?

During installation your tiler seals the surface with **Fila PW10** before grouting, so grout cannot lodge in the texture, then removes any haze with **Fila Deterdek Pro**. Your floor arrives ready to enjoy.

## Fixing the little things

### Grubby or greying grout

Fila Fuganet: spray on, leave a few minutes, scrub lightly, rinse. [View](#) →

### Mould and mildew in wet areas

Fila RapidSAN: spray, leave to work, wipe and rinse. [View](#) →

### Already non-slip

Microtech is designed to be non-slip when wet, so it needs no extra treatment. If you have standard tiles elsewhere that feel slippery underfoot, **Fila Progrip** can add invisible grip, just ask us.

## Find your fix
